Vision Statement

To become the leading online community for students across South Africa to learn, collaborate, and succeed together — one note and one question at a time.

Mission Statement

Our mission is to empower students by providing a simple and effective platform where they can share resources, connect with peers, and support each other's academic journey.

Origin

The Spark:

The idea came from my personal experience as a student. I noticed how difficult it was to find past papers, good notes, or even connect with classmates when struggling with a topic. Many students end up working alone, even when collaboration could make learning easier and more fun.

Idea Evolution:

At first, I imagined a basic file-sharing system for notes. After talking to other students and observing group WhatsApp chats, I realized there was a real need for organized study groups and a space to ask academic questions without judgment. That's when the idea expanded into a full platform.
