III. Brand Story

What Are We About? (Company Profile)

StudyBuddy Hub is an online platform designed for university and college students to easily share and access study materials, form virtual study groups, and get academic support from peers. The platform operates in the education technology (ed-tech) industry and focuses on creating a supportive online environment for collaborative learning. What makes us special is that we're created by students, for students, focusing on local institutions to ensure relevant and useful content.

Vision Statement

To become the leading online community for students across South Africa to learn, collaborate, and succeed together — one note and one question at a time.

Mission Statement

Our mission is to empower students by providing a simple and effective platform where they can share resources, connect with peers, and support each other's academic journey.

Origin

- **The Spark:** The idea came from personal experience as a student, noticing the difficulty in finding past papers, good notes, or connecting with classmates when struggling. Many students work alone, even when collaboration could make learning easier.
- **Idea Evolution:** The concept grew from a basic file-sharing system into a full platform after recognizing the need for organized study groups and a judgment-free space for academic questions.

IV. Brand Values

1. **Collaboration** – We believe in the power of shared knowledge and peer support to enhance learning.
2. **Accessibility** – Our platform is free and designed for students with limited financial resources.
3. **Local Relevance** – We focus on South African curricula and institutions to ensure practical utility.
4. **Inclusivity** – We create a welcoming space for all students, regardless of background or learning style.
5. **Innovation** – We continuously adapt to student needs with user-friendly tools and features.

V. Brand Personality

1. **Supportive** – We foster a nurturing environment where students feel encouraged to ask questions and share resources.
2. **Relatable** – Our tone is casual and student-centric, mirroring the language and challenges of our users.
3. **Energetic** – We inspire motivation and engagement through vibrant visuals and interactive features.

VI. Target Market

Customer

Our primary customer is the first-year tertiary student (18–22 years old) in South Africa, facing academic, financial, and social challenges. They rely heavily on mobile devices for learning and need affordable, localized resources. Our secondary audience consists of senior students who share resources or mentor peers.

- **Primary - Mary-Ann Peters:** Outgoing and busy. Struggles with organizing group study sessions and accessing organized materials.
- **Secondary - Kyle Johnson:** Tech-savvy but frustrated by fragmented communication tools like WhatsApp groups.
